

## **Leopard Lodge now runs on sunshine.**

Leopard Lodge, built by local craftsmen is a family-run game lodge situated on the banks of the Kafue River, in the heart of Zambia. The owners are committed to conservation and protection of the environment and have taken a further step in being eco-friendly, by becoming one hundred percent solar powered.

Converting the abundance of natural sunlight into electricity is proving a much cleaner, greener and efficient way of generating power at Leopard Lodge with no compromise on service or facilities.

Leopard Lodge consists of five luxurious, individually thatched, brick-built chalets, a restaurant and bar and six campsites. Due to it's location it offers guests numerous land and water based activities including fishing, boat-trips, game-drives, and walking safaris. There are also future plans to introduce scenic flights, micro lights, sunset cruises & a mini health spa.

The surrounding plains stretch for miles and are home to many species of wildlife. Game-viewing can be safely done whilst taking a leisurely walk or on a day or night game drive. The resident leopard and lion have been sighted within the camp catching impala, puku and bushbuck!
